MUHAMED FULAIL KT

LEAD FULL STACK DEVELOPER

fulailkt.dev@gmail.com | +91 7400468008 | linkedin.com/in/fulail-kt | github.com/Fulail-kt

PROFESSIONAL SUMMARY

Lead Full Stack Developer with expertise in **AI-driven integrations** and modern web frameworks. Driven by technical curiosity, continuously adopts emerging technologies and specializes in engineering scalable systems, leading agile workflows, and delivering exceptional user experiences.

SKILLS

Frontend Development: React, Next.js, HTML, CSS, JavaScript, Tailwind CSS, DaisyUI, Bootstrap, Zustand, Shadcn, MUI, Framer Motion, Redux, RTK Query, WebRTC, Tanstack Start, Vue

Backend Development: Node.js, Express.js, TypeScript, FastAPI, tRPC, Drizzle ORM, SQLAlchemy, Clean Architecture, Repository Pattern, REST API, OOP, MVC, Socket.IO, RabbitMQ

Database: MongoDB, PostgreSQL, MySQL, SQLite, Redis

Integrations & AI: OpenAI API, Meta Graph API (WhatsApp, Instagram, Facebook), Telegram API, Slack API, AWS SES, AWS S3, Stripe, Razorpay, NMI, Firebase, Cloudinary, JWT, TMDB

Automation & Tools: n8n, Zapier, Make, Git, GitHub, Figma, XD, Jira, Linear, Notion, Eraser.io, Miro, Cursor, Claude Code, Codex, Copilot, Antigravity

Deployment: Docker, Nginx, Atlas, AWS(EC2, IAM, ECS), CI/CD pipeline, GitHub Actions, Render, Netlify

Data Structure: Linked List, Searching, Sorting, Stack, Queue, HashMap, Tree, Trie, Graph, Heap

Familiar With: GraphQL, React Native, Nest.js, SDLC

PROFESSIONAL EXPERIENCE

Lead Full Stack & Automation Developer, PARTICLE EXECUTION · Dubai, UAE (remote)

- Sept 2024 - Present

Full Stack Developer, ZIKRABYTE SOLUTIONS · Bengaluru, Karnataka

- May 2024 - Sept 2024

MERN Stack Developer, Freelance · Calicut, Kerala

- Nov 2023 - May 2024

PROJECTS

Mindprint - Ticket Selling Platform · TypeScript, Next.js, Tailwind CSS, ShadCN, Framer Motion, Zustand, JWT, AWS (S3, SES, ECS), FastAPI, OpenAI API, PostgreSQL, Docker, Multi-Channel APIs

Project Link

- An enterprise **AI agent** platform allowing companies to deploy custom support and ticket-selling chatbots via a simple embeddable website script or unified **messaging channels** (WhatsApp, Facebook, Telegram, Instagram, Slack). The system features automated knowledge-base ingestion through **web scraping** and document uploads to train contextual AI agents, alongside **multi-tenant** organization management with **MFA** , role-based access control, team member controls, and agent testing sandboxes.

Startly - Online AI Hiring Platform · Next.js, TypeScript, tRPC (T3-App), OpenAI API, Drizzle ORM, DaisyUI, PostgreSQL

Project Link

- Built an AI-powered recruitment platform featuring an automated resume parser leveraging the OpenAI API to evaluate candidates against custom job requirements with weighted match scores. The platform includes dynamic candidate status tracking, automated online test workflows, and AWS SES integration for automated email notifications all powered by type-safe API pipelines for fast, reliable performance

SECURE VISA - Online Visa Application Platform · TypeScript, Next.js, Tailwind CSS, ShadCN, Framer Motion, Zustand, JWT, AWS S3, NMI Payment, Brevo Mail Service, Node.js, MongoDb, VPS

- An online **visa application** platform allowing users to apply for visas to any country. The system features **dynamic** application forms, secure **JWT** authentication, real-time tracking, and seamless **NMI** payment integration. It employs a **repository pattern** for efficient data management and uses **AWS S3** for secure document storage. The project emphasizes a user-friendly design with Tailwind CSS and ShadCN, and is built with TypeScript, Next.js, and Zustand

MY AIR DEAL - Online Flight Ticket Booking Application · JWT, Tailwind CSS, Redux, React, Node.js, Express, MongoDB, Cloudinary, Razor Payment, Brevo Mail Service, VPS (Hostinger)

- An online flight booking platform enabling users to book flights to any destination. Features include flight booking, meal selection , baggage selection **seat selection** with **seat maps** , and **invoice** generation using **PDFKit** . The application emphasizes a user-friendly design and secure authentication.

DOC2HEAL- Online Consultation Platform · Clean Architecture, RestAPI, React, Typescript, Node.js, Express.js, Tailwind CSS, Redux Toolkit, MongoDB, Cloudinary, Docker, JWT, Socket.IO, WebRTC, Aws ECS

- Engineered an online healthcare platform with secure **JWT** authentication via **email and OTP**, **real-time video** consultations using **WebRTC**, and **live chat** with doctors. Integrated **Stripe** for appointment bookings, deployed on **AWS ECS**, and automated delivery with **GitHub Actions CI/CD**.

MINDSAT - Learning Management System · JWT, Tailwind CSS, React, Node.js, Express, MongoDB, AWS S3, Framer Motion

- Built an SAT prep platform featuring course enrollment, diagnostic tests, dynamic quizzes, assignments, and AWS S3 media management

BTM - School Website · React, Tailwind CSS, Slider.js

- Responsive educational website featuring dynamic image sliders, responsive UI layout, and automated Vercel deployment

OURS - E Commerce · EJS, Node.js, Express.js, MongoDB, Rest API, Bootstrap, AWS EC2, Nginx, Node Mailer, OAuth

- Full-stack clothing marketplace featuring coupon code systems, email OTP security, Razorpay checkout, and AWS EC2/Nginx hosting.

EDUCATION

BACHELOR OF AFSAL UL ULAMA, Calicut University — Jan 2019 - Jan 2022
